The screenshot shows a terminal window titled "SSH from Windows to EC2" with a sub-window "ec2-user@ip-172-31-10-218:". The terminal displays a Docker Compose file configuration for a service named "gitea". The configuration includes the image "gitea/gitea:latest", container name "gitea", restart policy "always", environment variables "USER_UID=1000" and "USER_GID=1000", a volume mapping for "/gitea:/data", and port mappings "3000:3000" and "22:22". The terminal interface includes a left sidebar with navigation icons and a bottom status bar showing "17,1" and "All".

The screenshot shows the AWS Management Console interface for configuring a security group. The top navigation bar includes the AWS logo, a search bar, and the account ID '6237-0616-7686'. The main content area is titled 'EC2 > Security Groups > sg-0e0224478c86fcdb9 - Lab8SecurityGroup'. A green notification banner at the top indicates that the inbound security group rules were successfully modified. Below this, the 'Details' tab shows the security group's owner (623705167686), inbound rules count (2), and outbound rules count (1). The 'Inbound rules' tab is selected, displaying a table with two rules. The first rule is 'sgr-007171b215c3d88bf' with IP version 'IPv4', type 'Custom TCP', and protocol 'TCP'. The second rule is 'sgr-035a14f649f077a5a' with IP version 'IPv4', type 'SSH', and protocol 'TCP'. The console also shows the 'Instances' section on the left sidebar, which includes links to 'Instances', 'Instance Types', 'Launch Templates', 'Spot Requests', 'Savings Plans', 'Reserved Instances', 'Dedicated Hosts', and 'Capacity Reservations'. The 'Images' section is also visible at the bottom left.
